HeidiSQL On Linux Installation Guidelines

Since HeidiSQL native is a windows application, it can be installed on Linux using the **Wine Software**.

Step 1. Download Wine

Running the following command will start the installation of Wine:

```
sudo apt-get install wine
```

Following the instructions. You will need to accept a license agreement for TrueType fonts. Use the arrow keys → , ← and "Enter" to operate.
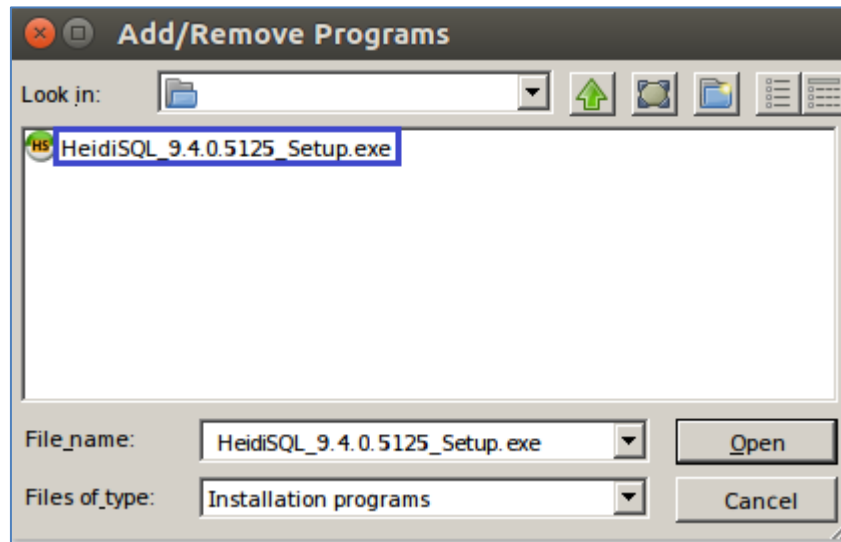

Step 2. Download the HeidiSQL installation file

Download the installer from http://www.heidisql.com/download.php.

Step 2. Open the Wine Program Installer

Click the "**Install**" button and **select the HeidiSQL file** that you've earlier **downloaded**.

Follow the installation steps by clicking "Next" button.
